<https://create-react-app.dev/docs/getting-started>

The screenshot shows the 'Create React App' documentation page. The left sidebar contains a navigation menu with the following items: 'Welcome', 'Getting Started' (highlighted), 'Folder Structure', 'Available Scripts', 'Supported Browsers and Features', 'Updating to New Releases', 'Development', 'Styles and Assets', 'Building your App', 'Testing', and 'Back-End Integration'. The main content area is titled 'Getting Started' and includes the text: 'Create React App is an officially supported way to create simple web applications with no configuration.' Below this is a 'Quick Start' section with a code block containing the following commands:

```
npx create-react-app my-app
cd my-app
npm start
```

 The text below the code block reads: 'If you've previously installed `create-react-app` globally you uninstall the package using `npm uninstall -g create-react-app` to ensure that `npx` always uses the latest version.'

```
// Tạo dự án mới
npx create-react-app my-app
```

```
// Khởi động dự án
cd my-app
npm start
```

```
// Thay đổi port
set PORT=8888 & npm start
```

```
// Một số lệnh khác
npm test
```
